

English		Bulgarian
able	having necessary power, skill, resources, or qualifications; qualified	сръчен, компетентен
ABS (Antilock Braking System) braking control	computer, sensors and solenoid valves which together monitor wheel speed and modulate braking force if wheel lockup is sensed during braking.	ABS спирачен контрол
accessory	a supplementary or subordinate unit; an adjunct	допълнителна част
acoustic	pertaining to the sense or organs of hearing, to sound, or to the science of sound	акустичен, звуков, слухов
acquire	to come into possession or ownership of	придобивам, добивам
acquire	gain something through one's efforts	научавам, усвоявам
addition	the act or process of adding, especially the process of computing with sets of numbers so as to find their sum	събиране, допълване, прибавка
adjust	to change (something) so that it fits, corresponds, or conforms; adapt; accommodate	регулирам
air conditioner	an apparatus for controlling, especially lowering, the temperature and humidity of an enclosed space	климатизатор
ammeter	an instrument for measuring current in amperes	амперметър
amplifier	an electronic component or circuit for amplifying power, current, or voltage	усилвател
amplify	to make larger, greater, or stronger; enlarge; extend	усилвам, увеличавам
appliance	an instrument, apparatus, or device for a particular purpose or use	уред
apprenticeship	the state in which a person is gaining instruction in a trade or art, under legal agreement	чиракуване
assemble	to put or fit together; put together the parts of	монтирам
assembler	a person or thing that assembles	монтъор
assembly	the putting together of manufactured parts to make a completed product, such as a machine or electronic circuit	сглобяване, монтаж
assembly room/shop		монтажен цех
automation	the technique, method, or system of operating or controlling a process by highly automatic means, as by electronic devices, reducing human intervention to a minimum	автоматизация
bender	an instrument used for bending	огъвачка
blueprint	a detailed outline or plan of action	подробен план, описание
boiler	an enclosed vessel in which water is heated and circulated, either as hot water or as steam, for heating or power	бойлер, котел
bolt	any of several types of strong fastening rods, pins, or screws, usually threaded to receive a nut	болт
brakes	a braking device consisting of a combination of interacting parts that work to slow a motor vehicle	спирачки
broadband	refers to telecommunication that provides multiple channels of data over a single communications medium, typically using some form of frequency or wave division multiplexing	широколентова връзка между две машини
broadband modem		широколентов модем

business	an occupation, profession, or trade	работа, занятие, служба
cable	an insulated electrical conductor, often in strands, or a combination of electrical conductors insulated from one another	кабел
cabling		окабеляване
cabling plans		кабелни схеми
calliper/caliper	an instrument for measuring thicknesses and internal or external diameters inaccessible to a scale, consisting usually of a pair of adjustable pivoted legs	шублер
carry out routine servicing		осъществява рутинен ремонт
cell	A box or other unit on a spreadsheet or similar array at the intersection of a column and a row	клетка в таблица
cell	also called battery, electric cell, electrochemical cell, galvanic cell, voltaic cell. a device that generates electrical energy from chemical energy, usually consisting of two different conducting substances placed in an electrolyte	гальваничен елемент
cell	any of various small compartments or bounded areas forming part of a whole	камера, секция, отсек
central heating boiler		котел за централно отопление
central heating system	A central-heating system provides warmth to the whole interior of a building (or portion of a building) from one point to multiple rooms	централна отоплителна система
checking	the act or an instance of inspecting or testing, as for accuracy or quality; examination	проверка
chiller	a device for cooling or refrigerating	охладител
circuit	of an electric current, including the generating apparatus, intervening resistors, or capacitors	електрическа верига
circuit	a closed, usually circular line that goes around an object or area	обиколка, окръжност
circuit	a path or route the complete traversal of which without local change of direction requires returning to the starting point; the act of following such a path or route	кръгообразно движение, въртене
circuit breaker/breaker	a device for interrupting an electric circuit to prevent excessive current, as that caused by a short circuit, from damaging the apparatus in the circuit or from causing a fire	прекъсвач (ел.)
circuit diagram	A simplified conventional pictorial representation of an electrical circuit. It shows the components of the circuit as simplified standard symbols, and the power and signal connections between the devices	диаграма на ел. вериги
coal	a black or dark-brown combustible mineral substance consisting of carbonized vegetable matter, used as a fuel	въглища
coil	a spiral pipe or series of spiral pipes	серпентина
commercial broadcasting	commercial broadcasting is the practice of broadcasting for profit. This is normally achieved by interrupting normal programming to air advertisements, also commonly called "commercials" in this context	комерсиални предавания
commercial college/school	a school that trains people for careers in business	търговски техникум/училище
computer network	a network of computers	компютърна мрежа
conductor	a substance or medium that conducts heat, light, sound, or especially an electric charge	проводник

connect (with, to)	to join, link, or fasten together; unite or bind	свързвам (се), съединявам (се)
control	the act or power of controlling; regulation; domination or command	контрол, проверка
cooling system	equipment in a motor vehicle that cools the engine	охладителна система
copper	a malleable, ductile, metallic element having a characteristic reddish-brown color: used in large quantities as an electrical conductor and in the manufacture of alloys, as brass and bronze	мед
cruise control	a system in a motor vehicle for maintaining a constant speed	контрол на скоростта по време на пътуване
damage	injury or harm that reduces value or usefulness	повреда
damper	a shock absorber	амортисьор
dehumidifier	an appliance for removing moisture from the air, as for lowering the humidity in a storage room	изсушител
designing	the act or art of making designs	планиране/проектиране
develop	to elaborate or expand in detail	развивам, разработвам
develop a fault	break down	разваля се
device	a thing made for a particular purpose; an invention or contrivance, esp. a mechanical or electrical one	апарат, устройство, механизъм
diagnostics	the discipline or practice of diagnosis	диагностика
digital	of, pertaining to, or using data in the form of numerical digits	цифров
disk/circular saw	a power saw having a disk-shaped blade, usually with a toothed edge	циркуляр
dismantle	to disassemble or pull down; take apart	демонтирам
drawing	a graphic representation by lines of an object or idea, as with a pencil; a delineation of form without reference to color	чертеж
drill/drilling machine	a shaftlike tool with two or more cutting edges for making holes in firm materials, esp. by rotation	бормашина
electric motor	a motor that converts electricity to mechanical work	електромотор
electrical testing equipment		електрическо тестово оборудване
electrical wiring diagrams		схеми на електрическата инсталация
electro-acoustics	the branch of electronics that deals with the conversion of electricity into acoustical energy and vice versa	електроакустика
electronic ignition	a system utilised in automobile engines, replacing contact breaker points in the distributor	електронно запалване
eliminate	to remove or get rid of, esp. as being in some way undesirable	премахвам, отстранявам
emergency repair work		аварийни работи
engine (car, ...)	a machine for converting thermal energy into mechanical energy or power to produce force and motion	мотор
engineer	person trained and skilled in the design, construction, and use of engines or machines, or in any of various branches of engineering	инженер
enhance	to make greater, as in value, beauty, or effectiveness; augment	повишавам, усилвам, увеличавам
equipment	anything kept, furnished, or provided for a specific purpose	оборудване

evaporator	the part of a refrigeration system in which the refrigerant absorbs heat and changes from a liquid to a gas	изпарител
exchange	telephone exchange	комутатор
expansion tank	an expansion tank is a small tank used in closed water heating systems and domestic hot water systems to absorb excess water pressure	разширителен съд
facilities	something designed, built, installed, etc., to serve a specific function affording a convenience or service	устройства, приспособления, екипировка, съоръжения
facility	readiness or ease due to skill, aptitude, or practice; dexterity	леснота, лекота, сръчност
factory	a building or group of buildings with facilities for the manufacture of goods	завод, фабричен, заводски
fan	any device for producing a current of air by the movement of a broad surface or a number of such surfaces	вентилатор
faulty	having faults or defects; imperfect	повреден
fibre	a fine, threadlike piece, as of cotton, jute, or asbestos	влакно, жичка
firewall	an integrated collection of security measures designed to prevent unauthorized electronic access to a networked computer system; a partition made of fireproof material to prevent the spread of a fire from one part of a building or ship to another or to isolate an engine compartment, as on a plane, automobile, etc.	защитна стена, защита
fit	adapted or suited; appropriate	годен, подходящ, съответстващ, удобен (for)
fitter	one who fits or adjusts the different parts of machinery to each other	механик, техник, шлосер, монтьор
flowmeter	an instrument for measuring the flow rate of a fluid in a pipe	разходомер
freezer	a refrigerator, refrigerator compartment, cabinet, or room held at or below 0°C	замразител
frequency	the number of times a specified periodic phenomenon occurs within a specified interval	честота
frequency	The property or condition of occurring at frequent intervals	повтаряне
fridge	a refrigerator	хладилник
fuel ignition system	the system in an internal-combustion engine that produces the spark to ignite the mixture of fuel and air: includes the battery, ignition coil, distributor, spark plugs, and associated switches and wiring	горивна запалителна ситема
fuel injection system	mechanical system to inject atomized fuel directly into the cylinders of an internal-combustion engine; avoids the need for a carburetor	горивна инжекционна система
fuse n.	safety device that protects an electric circuit from excessive current, consisting of or containing a metal element that melts when current exceeds a specific amperage, thereby opening the circuit	предпазител (ел.)
fuse v.	to become liquefied from heat	изгарям, стопявам (се)
gas	any combustible fluid used as fuel	газ
gas-burner	burner such that combustible gas issues from a nozzle to form a steady flame	газова горелка

gauge	any device or instrument for measuring, registering measurements, or testing something, esp. for measuring a dimension, quantity, or mechanical accuracy	измервателен уред
gearing	an assembly of parts, esp. a train of gears, for transmitting and modifying motion and torque in a machine	скоростна кутия
generate electricity	produce electricity	произвежда ел.ток
groove	a long, narrow cut or indentation in a surface, as the cut in a board to receive the tongue of another board	нут
groove and rabbet/tongue-and-groove joint	a method of fitting similar objects together, edge to edge, used mainly with wood: flooring, parquetry, panelling, and similar constructions	нут и федер
heat exchanger	a device for transferring the heat of one substance to another, as from the exhaust gases to the incoming air in a regenerative furnace	топлообменник
hub	the center part of a wheel, fan, or propeller	главина, втулка
hub cap/wheel cover/wheel trim	a decorative disk on an automobile wheel that covers at least a central portion of the wheel. Cars with stamped steel wheels often use a full wheel cover that conceals the entire wheel	тас
hub wheel		главина на колело
hydroelectric machinery		хидро-електрически съоръжения
idle	(of a machine, engine, or mechanism) to operate at a low speed, disengaged from the load	запалвам колата и работи на празен ход без да се движи
induction	the creation of a voltage difference across a conductive material (such as a coil of wire) by exposing it to a changing magnetic field	електрическа индукция
install	to place in position or connect for service or use	инсталирам
instance	an example put forth in proof or illustration	пример, отделен случай
insulation	the act of protecting something by surrounding it with material that reduces or prevents the transmission of sound or heat or electricity	изолация, изолиране
insulation/insulating material	a material that reduces or prevents the transmission of heat or sound or electricity	изолационен материал
jack	any of various portable devices for raising or lifting heavy objects short heights, using various mechanical, pneumatic, or hydraulic methods	крик
jack	a connecting device in an electrical circuit designed for the insertion of a plug	ел. пружинен превключвател, бутон
knob	a rounded handle, as on a drawer or door.	обла дръжка, топка
knob	a rounded control switch or dial.	копче (на уред)
know-how	knowledge of how to do something; faculty or skill for a particular activity; expertise	умение, вещина, сръчност
knowledge (of)	acquaintance with facts, truths, or principles, as from study or investigation; general erudition	знание
laboratory (lab)	a room or building equipped for scientific experimentation or research	лаборатория
launch	to set going; initiate	разполагам, поставям, инициирам
laying	the first coat on laths of plasterer's two-coat work	полагане

lead	an often flexible and insulated single conductor, as a wire, used in connections between pieces of electric apparatus	кабел
leak	through which liquid, gas, etc., enters or escapes	пропуск, теч
level	a device used for determining or adjusting something to a horizontal surface	нивелир, либела
level	height above ground	ниво
level of oil		ниво на масло
lever	a projecting handle used to adjust or operate a mechanism	лост, ръчка
line	a mark or stroke long in proportion to its breadth, made with a pen, pencil, tool, etc., on a surface	линия, черта, щриха
logical cell		логически елемент
loudspeaker	any of various devices, usually electronic, by which speech, music, etc., can be intensified and made audible throughout a room, hall, or the like	високоговорител
maintain	to keep in a condition of good repair or efficiency	поддържам
maintenance	the work of keeping something in proper condition; upkeep	поддържане
mast	a tall vertical antenna, as for a radio	прът за антена
measurement	the act of measuring or the process of being measured	мерене, измерване, мярка
mechanic	a person who repairs and maintains machinery, motors, etc.	механик
mechanical skill		техническа сръчност
meeting	a place or point of contact; junction	възел, съединение
microphone	an instrument capable of transforming sound waves into changes in electric currents or voltage, used in recording or transmitting sound	микрофон
moisture	condensed or diffused liquid, esp. water	влага
monitoring audio signals		следене на аудио сигнали
motor	a comparatively small and powerful engine, esp. an internal-combustion engine in an automobile, motorboat, or the like	мотор
mounting	the act of a person or thing that mounts	поставяне, инсталиране, монтиране
network	a system containing any combination of computers, computer terminals, printers, audio or visual display devices, or telephones interconnected by telecommunication equipment or cables: used to transmit or receive information	мрежа, система, радиотранслационна мрежа
novelty	state or quality of being novel, new, or unique; newness	новост
nuclear power station	plant using nuclear fission to produce electricity	ядрена електроцентрала
nut	a small block of metal or wood with a central, threaded hole that is designed to fit around and secure a bolt or screw	гайка
oil	refined or crude petroleum	нафта(мазут)
operate	to manage or use (a machine, device, etc.	обслужвам
operation	a process or series of acts especially of a practical or mechanical nature involved in a particular form of work	експлоатация

package	a bundle of something, usually of small or medium size, that is packed and wrapped or boxed; parcel	пакет, пакетиране, опаковка, контейнер
package	a complete program produced for the theater, television, etc., or a series of these, sold as a unit	радиопредаване/телевизионно предаване
pair of compasses	an instrument for drawing or describing circles, measuring distances, etc., consisting generally of two movable, rigid legs hinged to each other at one end	пергел
pipe cutter	a machine or tool used for cutting pipe	тръборез
plan	a drawing made to scale to represent the top view or a horizontal section of a structure or a machine, as a floor layout of a building	план, схема, проект
plant	the complete equipment or apparatus for a particular mechanical process or operation	апаратура, инсталация
pliers	small pincers with long jaws, for bending wire, holding small objects, etc. (usually used with <i>pair of</i>)	клещи
power	work done or energy transferred per unit of time	сила, мощност, енергия
power plant	a plant, including engines, dynamos, etc., and the building or buildings necessary for the generation of power, as electric or nuclear power	електростанция, електрическа централа.
premises	a building together with its grounds or other appurtenances	сграда
production	creation; manufacture	производство
production	something that is produced; a product	продукт, изделие
provider	one that makes something, such as a service, available	доставчик
pump	a machine or device for raising, compressing, or transferring fluids	помпа
putting into operation		въвеждане в експлоатация
range	the distance of something to be located from some point of operation, as in sound ranging	обхват, диапазон
receiver	a device or apparatus that receives electrical signals, waves, or the like, and renders them perceptible to the senses, as the part of a telephone held to the ear, a radio receiving set, or a television receiving set	радио приемник, телефонна слушалка
recording	the act of making a record	записване (звук), запис
renewable energy	any naturally occurring, theoretically inexhaustible source of energy, as biomass, solar, wind, tidal, wave, and hydroelectric power, that is not derived from fossil or nuclear fuel	възобновяема енергия
renewing	tending to impart new life and vigor to	възобновяем
repair	to restore to sound condition after damage or injury; fix	поправям
repair n;	the work, act, or process of repairing	ремонт
repair v;	to restore to a good or sound condition after decay or damage; mend	ремонтирам
replace	substitute a person or thing for	заменям
required work		необходима работа
rivet	a metal pin for passing through holes in two or more plates or pieces to hold them together, usually made with a head at one end, the other end being hammered into a head after insertion	нит
roof fitting flashing		изолация на покрива

roof weathering		покривна изолация
safety check		проверка на безопасността
satellite dish	a dish antenna used to receive and transmit signals relayed by satellite	сателитна чиния
scheme	a plan, design, or program of action to be followed; project	план, проект, програма,
scheme	a chart, diagram, or outline of a system or object	схема, скица, диаграма
scientific	of or pertaining to science or the sciences; systematic or accurate in the manner of an exact science	научен, точен, опитен
screw	a fastener with a tapered threaded shank and a slotted head	винт
service	installation, maintenance, or repairs provided or guaranteed by a dealer or manufacturer	обслужване/поправки (в гаранционен срок)
shift	to put (something) aside and replace it by another or others; change or exchange; to transfer from one place, position, person, etc., to another	меня (се), променям (се)
sieve	an instrument with a meshed or perforated bottom, used for separating coarse from fine parts of loose matter, for straining liquids, etc., esp. one with a circular frame and fine meshes or perforations	филтър, сито, решето
signal	an electrical quantity or effect, as current, voltage, or electromagnetic waves, that can be varied in such a way as to convey information	сигнал, импулс
site	the position or location of a town, building, etc., esp. as to its environment	местоположение, място
skill	the ability, coming from one's knowledge, practice, aptitude, etc., to do something well	умение
skill	a craft, trade, or job requiring manual dexterity or special training in which a person has competence and experience	занаят
socket	an opening or a cavity into which an inserted part is designed to fit	фасунга, цокъл, муфа
socket wrench	a box wrench with a socket that is an extension of the shank	глух гаечен ключ
solder v.	to join (metal objects) with solder	споявам, запоявам
soldering iron	an instrument for melting and applying solder	поялник
solve	to find the answer or explanation for; clear up; explain	решавам, намирам
sophisticated	complex or intricate, as a system, process, piece of machinery, or the like	сложен, усложнен
sound	the sensation produced by stimulation of the organs of hearing by vibrations transmitted through the air or other medium	звук, звукови трептения
sound power	the energy rate - the energy of sound per unit of time (J/s, W in SI-units) from a sound source	звукова мощност
spanner/spanner wrench	a wrench having a curved head with a hook or pin at one end for engaging notches or holes in collars, certain kinds of nuts, etc.	гаечен ключ
steam turbine	a turbine driven by steam pressure	парна турбина
steering	the act of guiding or showing the way	управляваща система
supervision	the act or function of supervising; superintendence	надзор, наблюдение
supplies	provision, stock, or store of food or other things necessary for maintenance	снабдяване, захранване

supply v.	to furnish or provide (something wanting or requisite)	подавам ток, захранвам
suspension	absorbers, hangers, etc., in an automobile, railway car, etc., connecting the wheel-suspension units or axles to the chassis frame	окачване
switch	a device for turning on or off or directing an electric current or for making or breaking a circuit	електрически ключ
switch off/turn off v.	to disconnect an electric circuit or the device it serves by operating a switch	изключвам
switch on/turn on v.	to connect an electric circuit or the device it serves by operating a switch	включвам
system	a coordinated body of methods or a scheme or plan of procedure; organizational scheme	система, метод, начин, мрежа
technical drawing	this type of drawing is used in the transforming of an idea into physical form. The process of creating a technical drawing is called drafting or technical drawing.	технически чертеж
technician	a person who is trained or skilled in the technicalities of a subject	техник
telecommunication system	a communication system for communicating at a distance	телекомуникационна система
telecommunications	the transmission of information, as words, sounds, or images, usually over great distances, in the form of electromagnetic signals, as by telegraph, telephone, radio, or television	телекомуникации
telephone exchanges	a telephone exchange or telephone switch is a system of electronic components that connects telephone calls	телефонна станция
telephone transmitter	the carbon microphone, also known as a carbon button microphone (or sometimes just a button microphone) or a carbon transmitter, is a sound-to-electrical signal transducer consisting of two metal plates separated by granules of carbon	микрофон в телефонна слушалка
testing	the act of subjecting to experimental test in order to determine how well something works	тестване, проверка
tongs	any of various implements consisting of two arms hinged, pivoted, or otherwise fastened together, for seizing, holding, or lifting something (usually used with pair of)	маша, щипки, клещи
troubleshooting	a form of problem solving; the systematic search for the source of a problem so that it can be solved	отстраняване на повреди
tweezers	small pincers, usually of metal, used for plucking or handling small objects	пинцети
valve	any device for halting or controlling the flow of a liquid, gas, or other material through a passage, pipe, inlet, outlet, etc.	вентил
valve receiver		детекторен приемник
vehicle	any substance that facilitates the use of a drug or pigment or other material that is mixed with it	проводник, спойка
vehicle's engine	vehicle's motor that converts thermal energy to mechanical work	двигател на моторно превозно средство
voltmeter	a calibrated instrument for measuring the potential difference between two points	волтметър
waste disposal unit	a device, usually electrically-powered, installed under a kitchen sink between the sink's drain and the trap which shreds food waste into pieces small enough to pass through plumbing	устройство за смилане на хранителни отпадъци,
wind turbine	a turbine powered by the wind	вятърна турбина

windscreen	transparent screen (as of glass) to protect occupants of a vehicle; windshield	предно стъкло на моторно превозно средство
wiring	the aggregate of wires in a lighting system, switchboard, radio, etc.	електрическа инсталация
worn out	used beyond repair	износен
wrench	any of various hand or power tools, often having fixed or adjustable jaws, used for gripping, turning, or twisting objects such as nuts, bolts, or pipes	тръбен ключ
