Erasmus+

The project “On Track” will develop a tracking system for graduates of vocational education and training.

The tracking tool will enable VET providers to monitor their students’ career and further education and gather data to improve their training programmes and services.

The aims of the project

- To analyze, in depth, the context and need in each country.
- To develop a tracking system for VET graduates at institute level that will feed into the quality assurance system of the VET provider.
- To pilot test and implement the tracking system, establish tracking mechanism and integrate it, in VET monitoring processes.
- To support VET providers to establish the tracking mechanism and integrate it into their quality assurance system.

“On Track” project addresses European policies and priorities and responds to common needs of European VET providers. The transnational partnership guarantees the development of a tracking mechanism and tools that responds to the needs of all involved countries and can be also transferred in other countries.

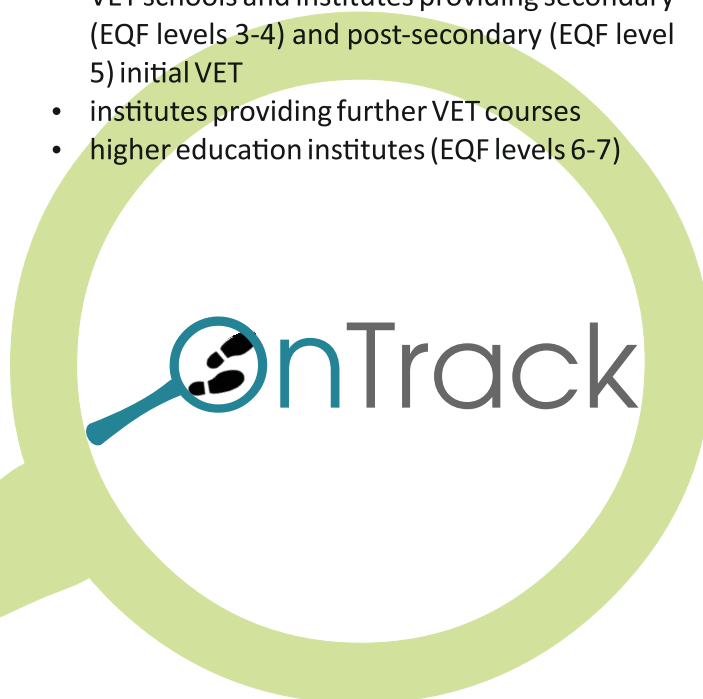

The results expected during the ‘On Track’ project are:

- 1. Context study of tracking systems and measures**
- 2. Tracking system for VET graduates**
- 3. Guide: Implement tracking system for VET graduates and integrate it into organization quality assurance system**

Target groups

The target groups of the project are:

- VET schools and institutes providing secondary (EQF levels 3-4) and post-secondary (EQF level 5) initial VET
- institutes providing further VET courses
- higher education institutes (EQF levels 6-7)
